January 01, 2022 January 01, 2022 January 01, 2022 January 01, 2022

January 01, 2022 January 01, 2022

New accounting standards / amendments and IFRS interpretations that are not yet effective

The following new accounting standards, interpretations and amendments to accounting and reporting standards are effective for accounting periods, beginning on or after the date mentioned against each of them. These amendments, interpretations and standards are, either not relevant to the Company's operations, or are not expected to have a significant impact on the Company's financial statements other than certain additional disclosures.

Standards or Interpretations

Effective from annual period beginning on or after:

IAS 1 - Presentation of financial statements (Amendments) IAS 8 - Accounting Policies, Changes in Accounting Estimates	January 01, 2023
and Errors (Amendments) IAS 12 - Deferred tax related to assets and liabilities arising from	January 01, 2023
single transaction (Amendments) IAS 7 - Statement of Cash Flows (Amendments) IFRS 17 - Insurance contracts (Amendments) IFRS 7 - Financial Instruments IFRS 16 - Leases (Amendments)	January 01, 2023 January 01, 2023 January 01, 2023 January 01, 2023 January 01, 2024

Other than the aforesaid amendments, the IASB has also issued the following standards which have not been adopted locally by the Securities and Exchange Commission of Pakistan:

IFRS 17 - Insurance contracts

IFRS 1 - First Time Adoption of International Financial Reporting Standards

4 BASIS OF MEASUREMENT

These financial statements have been prepared under the historical cost convention, except for the following material items:

- Investments in quoted equity securities (whether classified as financial assets measured at fair value through profit or loss, or through other comprehensive income or amortised cost), which are carried at fair value; and
- Derivative financial instruments, which are marked-to-market as appropriate under relevant accounting and reporting standards.

5 FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates. The financial statements are presented in Pakistani Rupee, which is the Company's functional and presentation currency. All amounts have been rounded to the nearest rupee, unless otherwise indicated.

6 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with approved accounting standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revision affects only that period, or in the period of revision and future periods in other cases. Judgments made by management in the application of approved accounting standards that may have a significant effect on the financial statements and estimates with significant risk of material adjustment in the next year are discussed in respective policy notes. The areas where various assumptions and estimates are significant to the Company's financial statements or where judgment was exercised in application of accounting policies are as follows:

6.1 Depreciation method, rates and useful lives of property and equipment

The management of the Company reassesses useful lives, depreciation method, and rates for each item of property, plant and equipment annually by considering expected pattern of economic benefits that the Company expects to derive from those items.

6.2 Taxation

The Company takes into account income tax law and decisions taken by appellate authorities. Instances where the Company's view differs from the view taken by tax department at the assessment stage and where the Company considers that its view of items of material nature is in accordance with law, the amounts are shown as contingent liabilities.

6.3 Provisions

Provisions are based on best estimate of the expenditure required to settle the present obligation at the reporting date, that is, the amount that the Company would rationally pay to settle the obligation at the reporting date or to transfer it to a third party.

6.4 Expected credit losses

The Company recognizes an impairment gain or loss in the statement of profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

7 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

7.1 Property, plant and equipment

Items of property and equipment are stated at cost less accumulated depreciation (if any) and impairment losses (if any). Cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Where such subsequent costs are incurred to replace parts and are capitalized, the carrying amount of replaced parts is derecognized. All other repair, maintenance and day-to-day servicing expenditures are charged to the profit and loss account during the year in which they are incurred.

Depreciation on all items of property and equipment is calculated using the reducing balance method, in accordance with the rates specified in Note 8 to these financial statements and after taking into account residual value, if material. Residual values and useful lives are reviewed and adjusted, if appropriate, at each balance sheet date. Depreciation is charged on an asset from when the asset is available for use until the asset is disposed off.

An item of property and equipment is derecognized upon disposal or when no future benefits are expected from its use or disposal. Any gain or loss arising on asset derecognition (calculated as the difference between net disposal proceeds and the carrying amount of the asset) is included in the profit and loss account in the year in which the asset is derecognized.

The Company reviews the useful life and residual value of property, plant and equipment on a regular basis. Any change in estimates in future years might affect the carrying amounts of the respective items of property, plant and equipment with a corresponding effect on depreciation charge and impairment.

7.2 Intangible assets

Intangible assets with indefinite useful lives, including Trading Right Entitlement Certificate ("TREC") and Universal Membership Rights at Pakistan Mercantile Exchange Limited, are stated at cost less accumulated impairment losses, if any. An intangible asset is considered as having an indefinite useful life when, based on an analysis of all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Company. An intangible asset with an indefinite useful life is not amortized. However, it is tested for impairment at each balance sheet date or whenever there is an indication that the asset may be impaired. Gains or losses on disposal of intangible assets, if any, are recognized in the profit and loss account during the year in which the assets are disposed of.

7.3 Financial instruments

Recognition and initial measurement

The Company, on the date of initial recognition, recognizes loans, debt securities, equity securities and deposits at the fair value of consideration paid. Regular-way purchases and sales of financial assets are recognized on the trade date. All other financial assets and liabilities, including derivatives, are initially recognized on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The initial measurement of a financial asset or liability is at fair value plus transaction costs that are directly attributable to its purchase or issuance. For instruments measured at fair value through profit or loss, transaction costs are recognized immediately in profit or loss.

Classification and Measurement of Financial Assets

IFRS 9 eliminates the IAS 39 categories for financial assets (held-to-maturity, loans and receivables, held-for-trading and available-for-sale). Instead, IFRS 9 classifies financial assets into the following categories:

- Fair value through profit or loss ("FVTPL");
- Fair value through other comprehensive income ("FVOCI");
- Amortized cost:
- Elected at fair value through other comprehensive income (equities only); or
- Designated at FVTPL

Financial assets include both debt and equity instruments.

(ii) Subsequent Measurement

- Debt Investments at FVOCI: These assets are subsequently measured at fair value. Interest / mark-up income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in the statement of profit or loss. Other net gains and losses are recognized in other comprehensive income. On de-recognition, gains and losses accumulated in other comprehensive income are reclassified to the statement of profit or loss.
- Equity Investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognized as income in the statement of profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to the statement of profit or loss.
- Financial assets at FVTPL: These assets are subsequently measured at fair value. Net gains and losses, including any interest / mark-up or dividend income, are recognized in profit or loss.
- Financial assets measured at amortized cost: These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest / mark-up income, foreign exchange gains and losses and impairment are recognized in the statement of profit or loss.

Financial liabilities

Financial liabilities are classified as measured at amortized cost or 'at fair value through profit or loss' (FVTPL). A financial liability is classified as at FVTPL if it is classified as held for trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in the statement of profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in the statement of profit or loss. Any gain or loss on derecognition is also recognized in the statement of profit or loss.

Financial liabilities are derecognized when the contractual obligations are discharged or cancelled or have expired or when the financial liability's cash flows have been substantially modified.

De-recognition

(i) Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire or when it transfers the financial assets and substantially all the associated risks and rewards of ownership to another entity. On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying value and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain of loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument which the Company has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to statement of changes in equity.

(i) Financial liabilities

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any noncash assets transferred or liabilities assumed, is recognised in the statement of profit or loss and other comprehensive income.

Regular way purchases or sales of financial assets

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention on the market place. Regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

Derivatives

Derivative instruments held by the Company comprise of future and forward contracts in the capital and money markets. These are stated at fair value at the date of statement of financial position. The fair value of the derivatives is equivalent to the unrealized gain or loss from marking the derivatives using prevailing market rates at the date of statement of financial position. The unrealized gains are included in other assets while unrealized losses are included in other liabilities in the statement of financial position. The corresponding gains and losses are included in the statement of profit or loss.

Offsetting of financial assets and financial liabilities

A financial asset and a financial liability is offset and the net amount is reported in the statement of financial position if the Company has a legally enforceable right to set-off the recognized amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

7.4 Leases

For contracts entered into, or modified, on or after January 1, 2019; the Company assesses whether a contract contains a lease or not at the inception of a contract. The Company reassesses whether a contract is, or contains, a lease further when the terms and conditions of the contract are modified.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably certain to not to exercise that option.

The Company reassesses whether it is reasonably certain to exercise an extension option, or not to exercise a termination option, upon the occurrence of either a significant event or a significant change in circumstances that is within the control of the Company and affects whether the Company is reasonably certain to exercise an option not previously included in its determination of the lease term, or not to exercise an option previously included in the determination of

The Company revises the lease term if there is a change in the non-cancellable period of a lease.

7.4.1 Company as a lessee

Recognition

The Company recognizes a right-of-use asset and a lease liability at the commencement date. A commencement date is the date on which the lessor makes an underlying asset available for use by the lessee (the Company).

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases of all underlying assets that have a lease term of 12 months or less and leases for which the underlying asset, when new, is of low-value as per the threshold set by the Company. The Company recognizes the lease payments associated with these leases as an expense on straight-line basis over the lease term.

Initial measurement

Lease liability

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid. The lease payments are discounted using the interest rate implicit in the lease, or the Company's incremental borrowing rate if the implicit rate is not readily available. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments comprise fixed payments less any lease incentives receivable; variable lease payments that depend on an index or a rate; amounts expected to be payable by the Company under residual value guarantees; the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate the

Right-of-use

The Company initially measures the right-of-use asset at cost. This cost comprises the amount of lease liability as initially measured, plus any lease payments made on or before the commencement date, less lease incentives received, initial direct costs and estimated terminal costs (i.e. dismantling or other site restoration costs required by the terms and conditions of the lease contract).

Subsequent measurement

Lease liability

After the commencement date, the Company re-measures the lease liability to reflect the affect of interest on outstanding lease liability, lease payments made, reassessments and lease modifications etc. Variable lease payments not included in the measurement of the lease liability and interest on lease liability are recognized in the statement of profit or loss account, unless these are included in the carrying amount of another asset.

Lease payments are apportioned between the finance charges and reduction of the lease liability using the incremental borrowing rate implicit in the lease to achieve a constant rate of interest on the remaining balance of the liability.

Right-of-use

After the commencement date, the Company measures the right-of-use asset at cost less accumulated depreciation and accumulated identified impairment losses, if any, adjusted for any remeasurement of the lease liability.

The Company depreciates the cost of right-of-use asset, net of residual value, from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. However, if the lease contract transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise the purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset.

7.5 Impairment

7.5.1 Financial assets

The Company's financial assets that are subject to the impairment requirements of IFRS 9 are trade receivables, advisory and consultancy fee receivable.

The Company applies the IFRS 9 'Simplified Approach' to measuring expected credit losses which uses a lifetime expected loss allowance for all above mentioned financial assets. The Company measures expected credit losses in a way that reflects an unbiased and probability-weighted amount, time value of money and reasonable and supportable information at the reporting date about the past events, current conditions and forecast of future economic conditions. The Company recognises in profit and loss account, as an impairment loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date.

7.5.2 Non-financial assets

The carrying amounts of non-financial assets are assessed at each reporting date to ascertain whether there is any indication of impairment. If such an indication exists, the asset's recoverable amount - defined as the higher of the asset's fair value less costs of disposal and the asset's value-in-use (present value of estimated future cash flows using a pre-tax discount rate that reflects current market assessments of the time value of money and asset-specific risk) - is estimated to determine the extent of the impairment loss.

Impairment losses recognized in prior periods are assessed at each reporting date to determine whether there are any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent of the carrying amount of the asset (or CGU) that would have been determined (net of depreciation / amortization) had no impairment loss been recognized.

7.6 Trade debts and receivables

Financial assets

These are classified at amortized cost and are initially recognized when they are originated and measured at fair value of consideration receivable. These assets are written off when there is no reasonable expectation of recovery. Actual credit loss experience over past years is used to base the calculation of expected credit loss.

Non-financial assets

These, both on initial recognition and subsequently, are measured at cost.

Trade debts and other receivables

Trade debts and other receivables are stated initially at amortised cost using the effective interest rate method. Provision is made on the basis of lifetime ECLs that result from all possible default events over the expected life of the trade debts and other receivables. Bad debts are written off when considered irrecoverable.

7.7 Income tax

Current

Provision for current taxation is based on taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using rates enacted or substantively enacted at the reporting date, and takes into account tax credits, exemptions and rebates available, if any. The charge for current tax also includes adjustments, where necessary, relating to prior years which arise from assessments framed / finalized during the year. The charge for current tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity or in other comprehensive income.

Deferred

Deferred tax is recognized using the balance sheet liability method in respect of temporary differences arising from differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax is calculated using rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax liabilities are recognized for all taxable temporary differences. A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax asset is reduced to the extent that it is no longer probable that the related tax benefits will be realized. Deferred tax is not recognized on temporary differences arising from the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences arising on the initial recognition of goodwill.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity.

Deferred tax is charged or credited to the income statement, except in the case of items credited or charged to comprehensive income or equity, in which case it is included in comprehensive income or equity.

The Company takes into account current income tax law and decisions taken by tax authorities. In instances where the Company's views differ from the income tax department at the assessment stage and where the Company considers that its view on items of material nature is in accordance with law, the relevant amounts are disclosed as contingent liabilities.

7.8 Cash and cash equivalents

Cash and cash equivalents are carried at cost and include cash in hand, balances with banks in current and deposit accounts, stamps in hand, other short-term highly liquid investments with original maturities of less than three months and short-term running finances.

7.9 Share capital

Ordinary shares are classified as equity and recognised at their face value.

7.10 Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made. The amount recognized represents the best estimate of the expenditure required to settle the obligation at the balance sheet date. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

7.11 Borrowings

These are recorded at the proceeds received. Finance costs are accounted for on accrual basis and are disclosed as accrued interest / mark-up to the extent of the amount unpaid at the reporting date.

7.12 Borrowing costs

Borrowing costs are recognized as an expense in the period in which these are incurred except to the extent of borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. Such borrowing costs, if any, are capitalized as part of the cost of the relevant asset.

7.13 Revenue recognition

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Company and the amount of revenue can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, net of any direct expenses. Revenue is recognized on the following basis:

- Brokerage and commission income is recognized when brokerage services are rendered.
- Dividend income is recognized when the right to receive the dividend is established.
- Underwriting commission (if any) is recognized when the agreement is executed. Take-up commission is recognized at the time the commitment is fulfilled.
- Return on deposits is recognized using the effective interest method.
- Income on fixed term investments is recognized using the effective interest method.
- Gains / (losses) arising on sale of investments are included in the profit and loss account in the period in which they arise.
- Unrealized capital gains / (losses) arising from marking to market financial assets classified as financial assets at fair value through profit or loss are included in profit and loss during the period in which they arise.
- Income / profit on exposure deposits is recognized using the effective interest rate.

7.14 Foreign currency transactions and translation

Monetary assets and liabilities in foreign currencies are translated into functional currency at the rates of exchange prevailing at the balance sheet date. Transactions in foreign currencies are translated into functional currency at the rates of exchange prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in income.

7.15 Related party transactions

All transactions involving related parties arising in the normal course of business are conducted and recorded at mutually agreed prices duly approved by the Board.

8 INTANGIBLE ASSETS

	Note		
PSX Trading Rights Entitlement Certificate ("TREC") Impairment on TREC	8.1	2,500,000	2,500,000
		2,500,000	2,500,000
PMEX Trading Rights Certificate		1,250,000	1,250,000
		3,750,000	3,750,000

8.1 Pursuant to the Stock Exchange (Corporatization, Demutualization and Integration) Act, 2012, stock exchanges operating as guarantee limited companies were converted to public limited companies. Ownership rights in exchanges were segregated from the right to trade on an exchange. As a result of such demutualization and corporatization, the Company received shares of the relevant exchange and a Trading Rights Entitlement Certificate ("TREC") against its membership card.

The TREC has been recorded as an indefinite-life intangible asset pursuant to the provisions and requirements of IAS 38. There is no active market for determination of value of TREC. TREC has been valued at notional value of Rupees 2.5 million notified in PSX Rule Book. The TREC, which has been pledged with the PSX to meet Base Minimum Capital ("BMC") requirements, is assessed for impairment in accordance with relevant approved accounting standards.
